## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/JP04/001334

**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

## 1. Statement

Novelty (N)	Claims	1-24	YES
	Claims		NO
Inventive step (IS)	Claims	1-24	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-24	YES
	Claims		NO

## 2. Citations and explanations (Rule 70.7)

None of the documents cited in the ISR describes the invention of claims 1-24, which uses a first combustion area, a second combustion area and a third combustion area, to each of which one of rich to lean air-fuel mixtures different in air-fuel ratio is supplied for combustion in descending order of ratio, wherein the amount of air sucked into a combustion chamber is controlled in a mode different from an ordinary mode when the first combustion area is switched to the third combustion area or vice versa, to ensure that the amount of NO<sub>x</sub> emission and torque variation downstream of an exhaust emission cleaning device can be minimized when the air-fuel mixture passes through the second combustion area. This constitution is not considered to be obvious to a person skilled in the art either.
